

EDYTA GRZYB

PRINTS

Edyta Grzyb (born 1984) living in Poland

The preferred motif of her work is people; Strictly speaking, she is interested in their emotions, expressing them through contrasting colors, and occasionally blurring the lines between reality and fiction. She is of the opinion that painting lives through vivid colours, stimulating esthetic feelings and emotions in the observer. Through the combination of cool tones and intensive neon colours, she transports her audience into a world of fantasy.

Used technique: Acrylics on canvas in Pop Art-Style.

Edyta has been painting since 2004 and has specialized in acrylic painting since 2013. Many of her works are already in private collections. Edyta Grzyb quickly established herself in the international art scene, so her works developed promisingly in value. Since 2015, the talented painter has been increasingly involved in group exhibitions in Hamburg, Munich, Warsaw and exhibited at the Art Fairs in New York and Hong Kong.
